

Key Findings and Next Steps

Malaria Elimination Action Framework

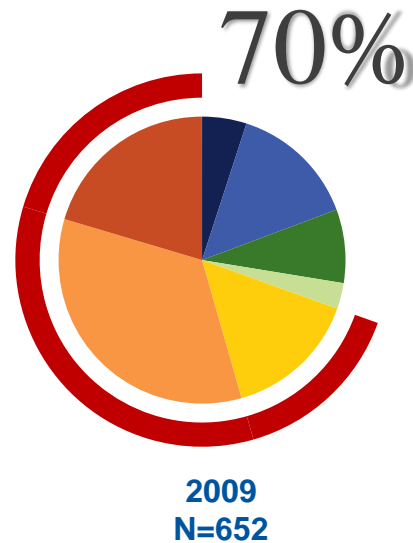

MEAF Objective: Achieve universal coverage of case management services by 2016 to ensure 100% parasitological diagnosis of all suspected cases and effective treatment of all confirmed cases.

Goal of ACTwatch: To provide policy makers with actionable evidence to inform and monitor national and global policy, strategy, and funding decisions for improving malaria case management and elimination efforts.

Desire to understand gaps and opportunities

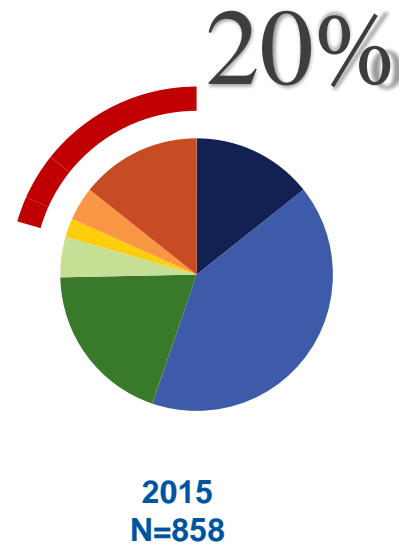

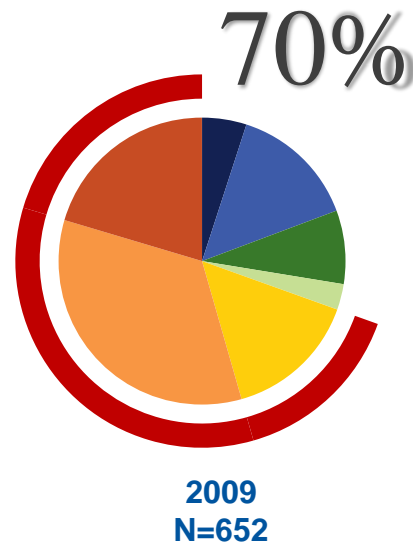

1. How has the antimalarial market composition changed over time?

- Public Health Facility
- Village Malaria Worker
- Private For-Profit Health Facility
- Pharmacy
- Drug Store
- General Retailer
- Itinerant Drug Vendor

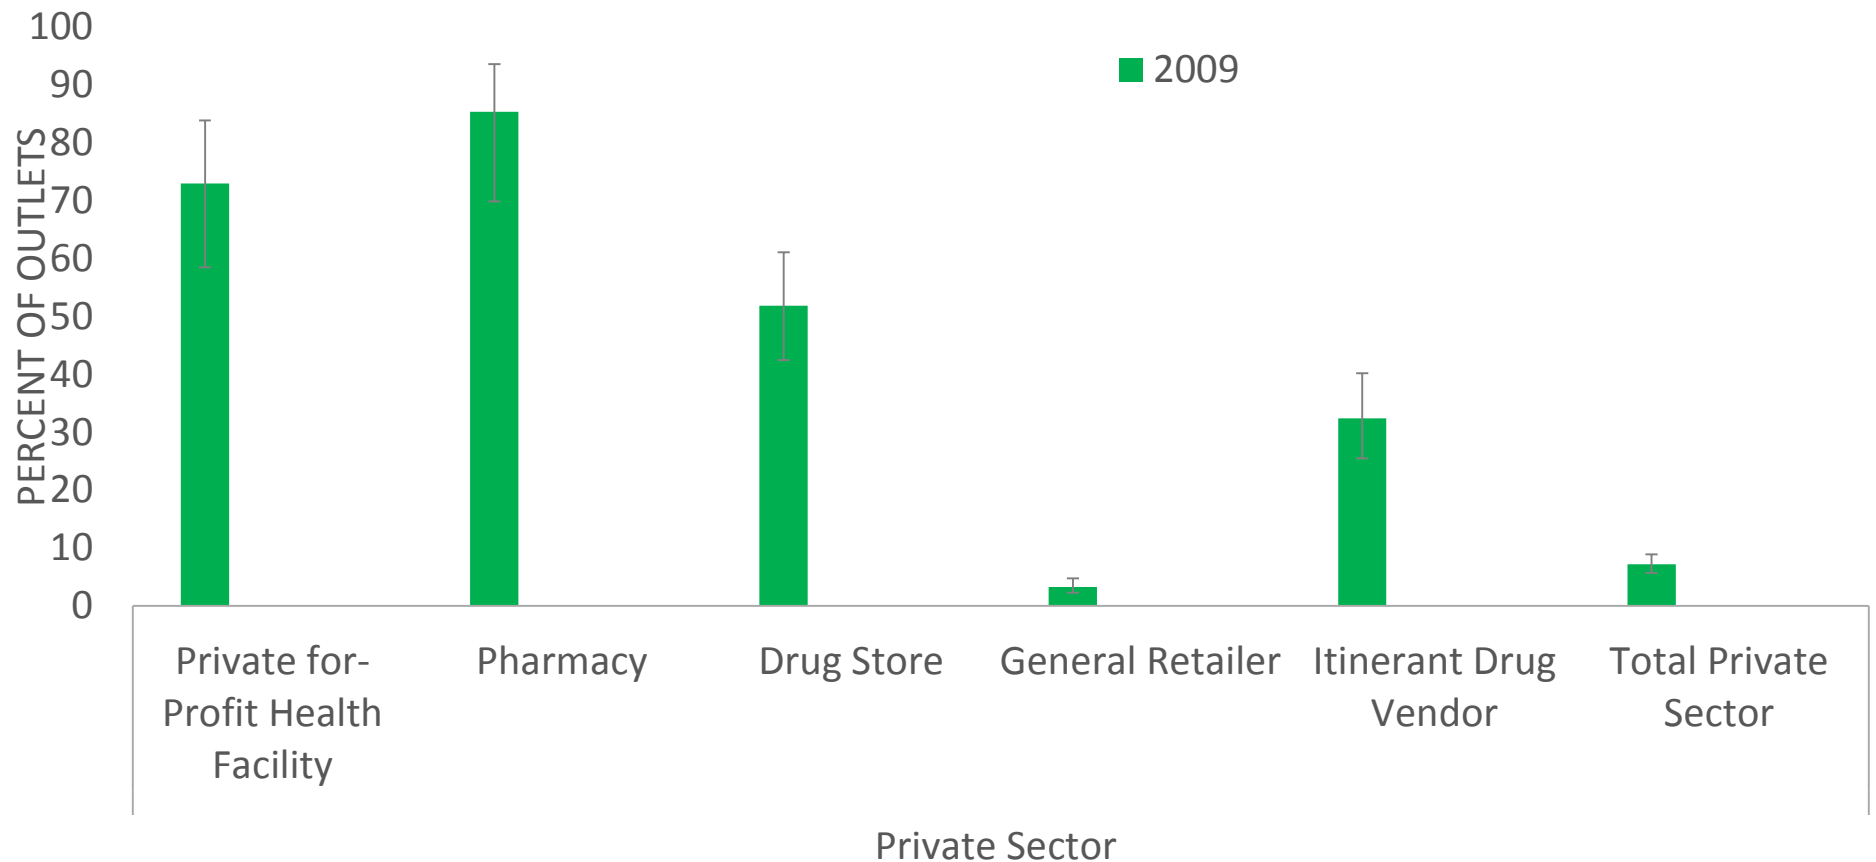

1. How has the antimalarial market composition changed over time?

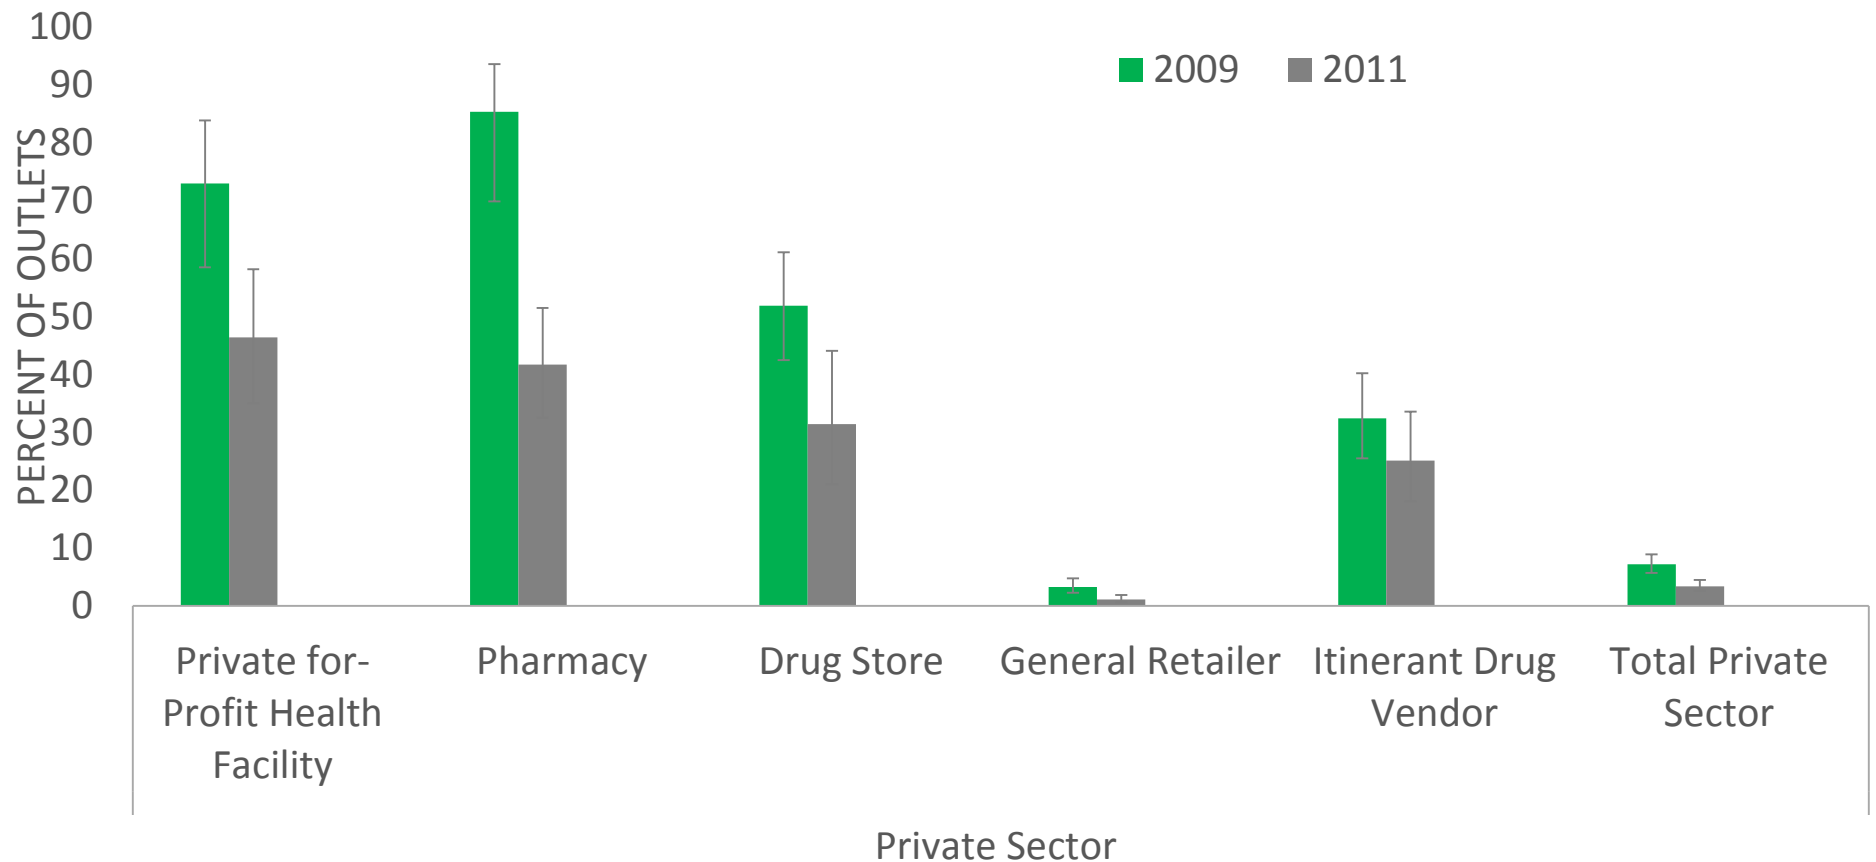

- Public Health Facility
- Village Malaria Worker
- Private For-Profit Health Facility
- Pharmacy
- Drug Store
- General Retailer
- Itinerant Drug Vendor

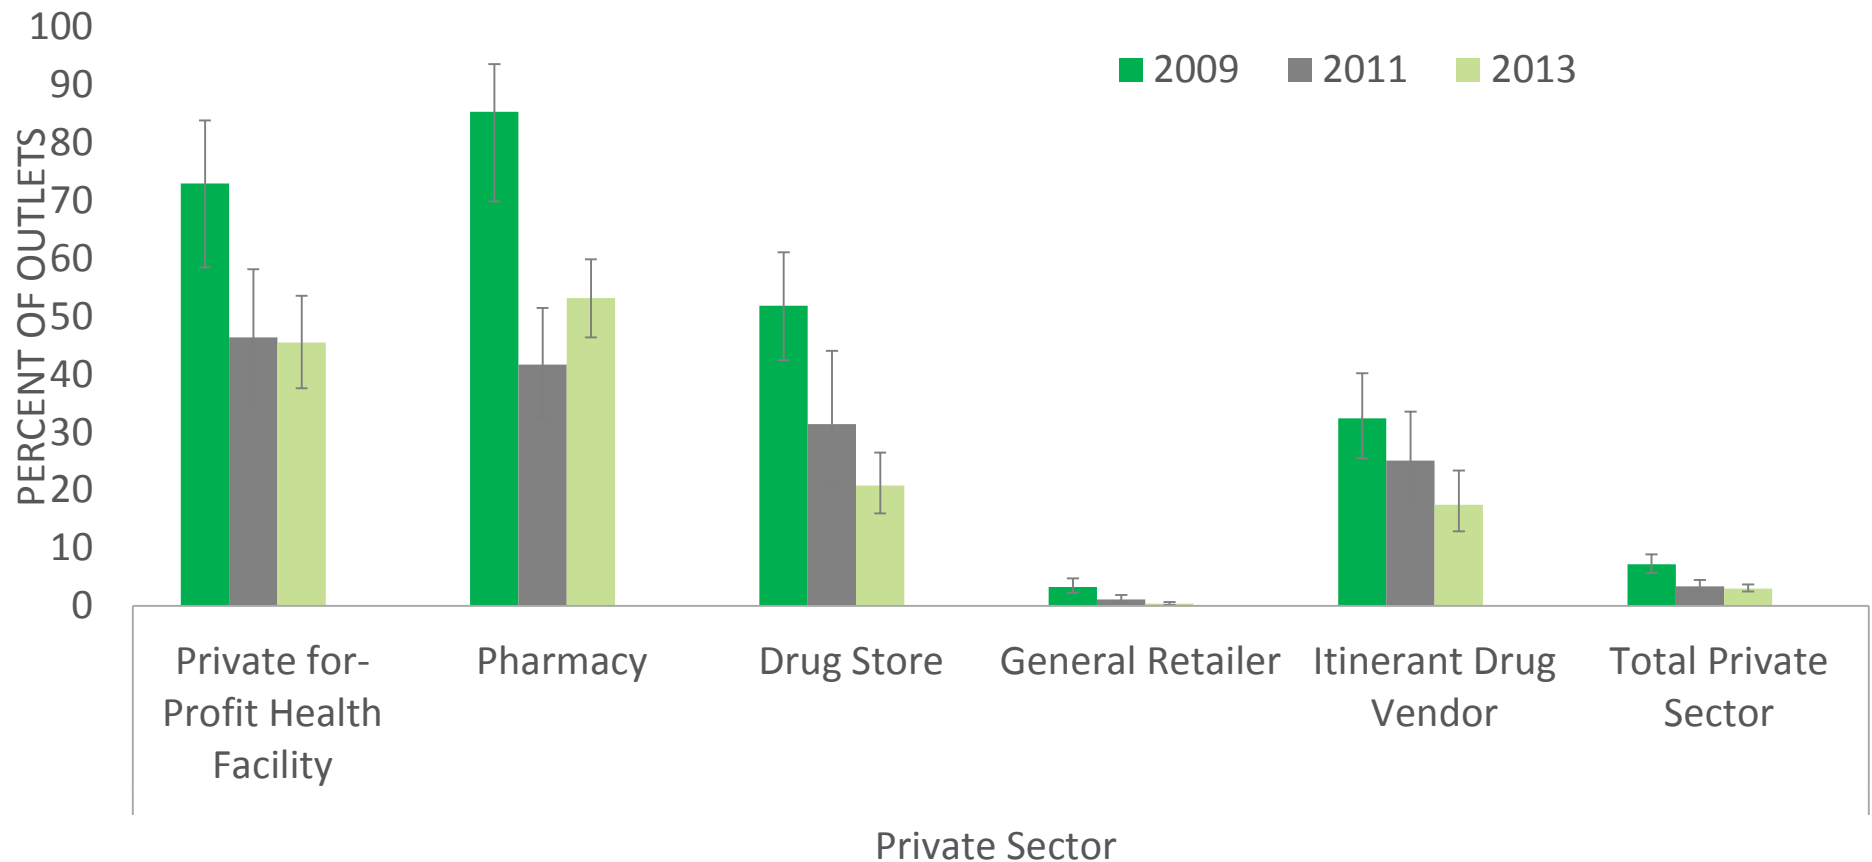

2. Availability of any antimalarial declines in the private sector

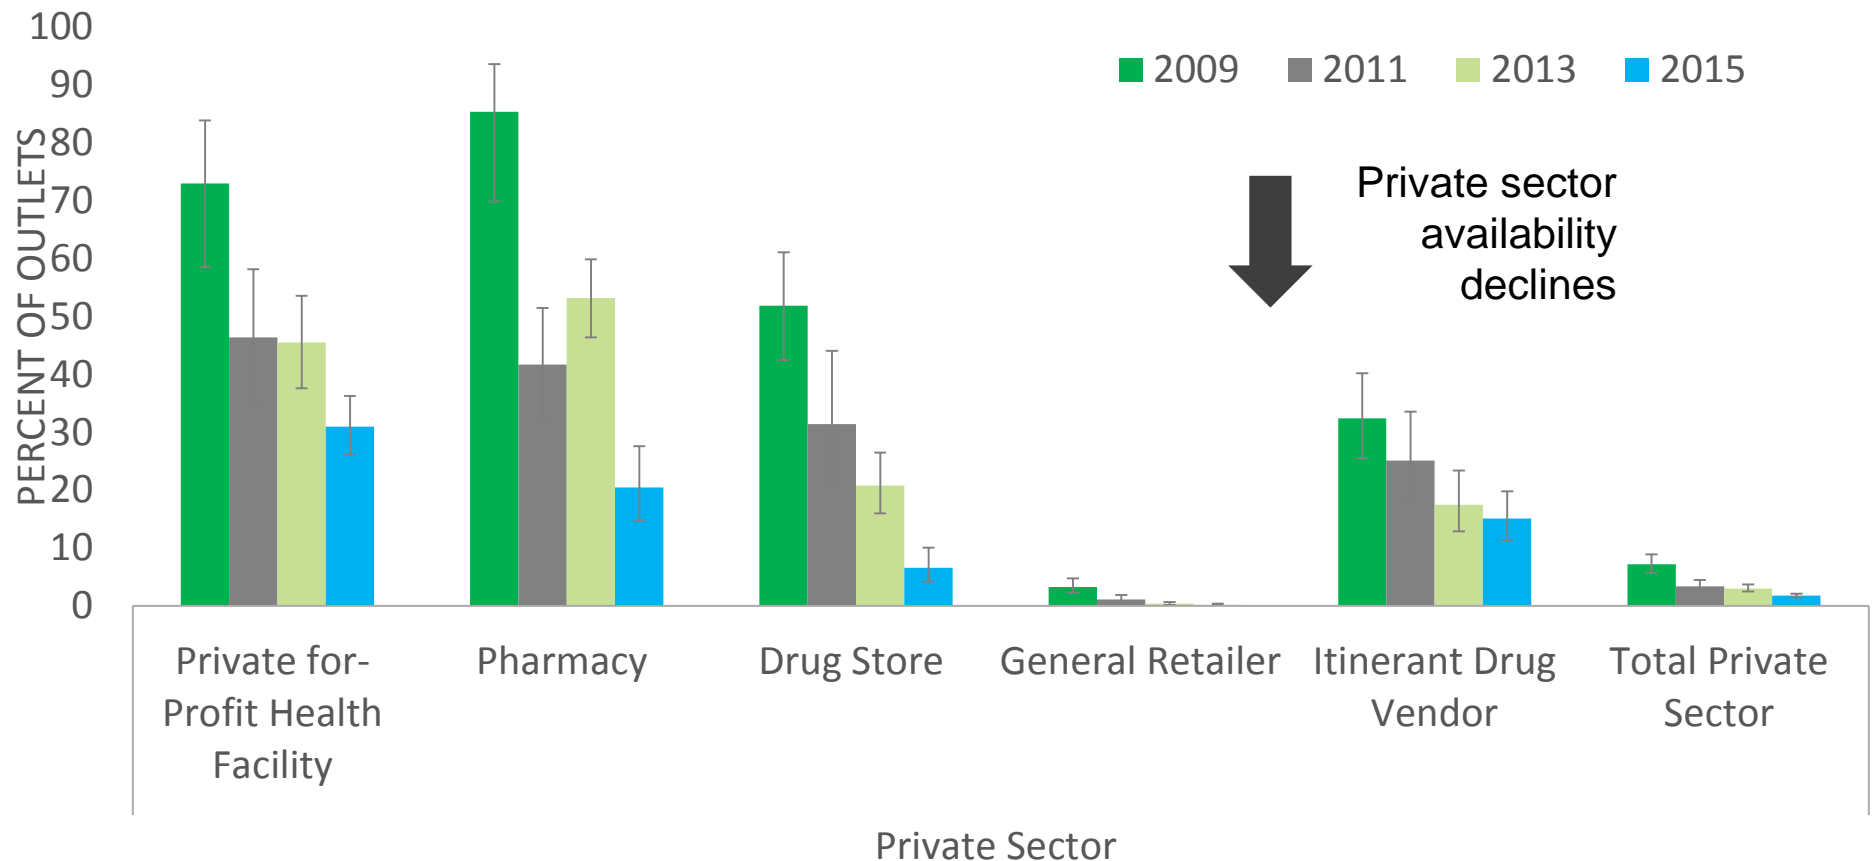

2. Availability of any antimalarial declines in the private sector

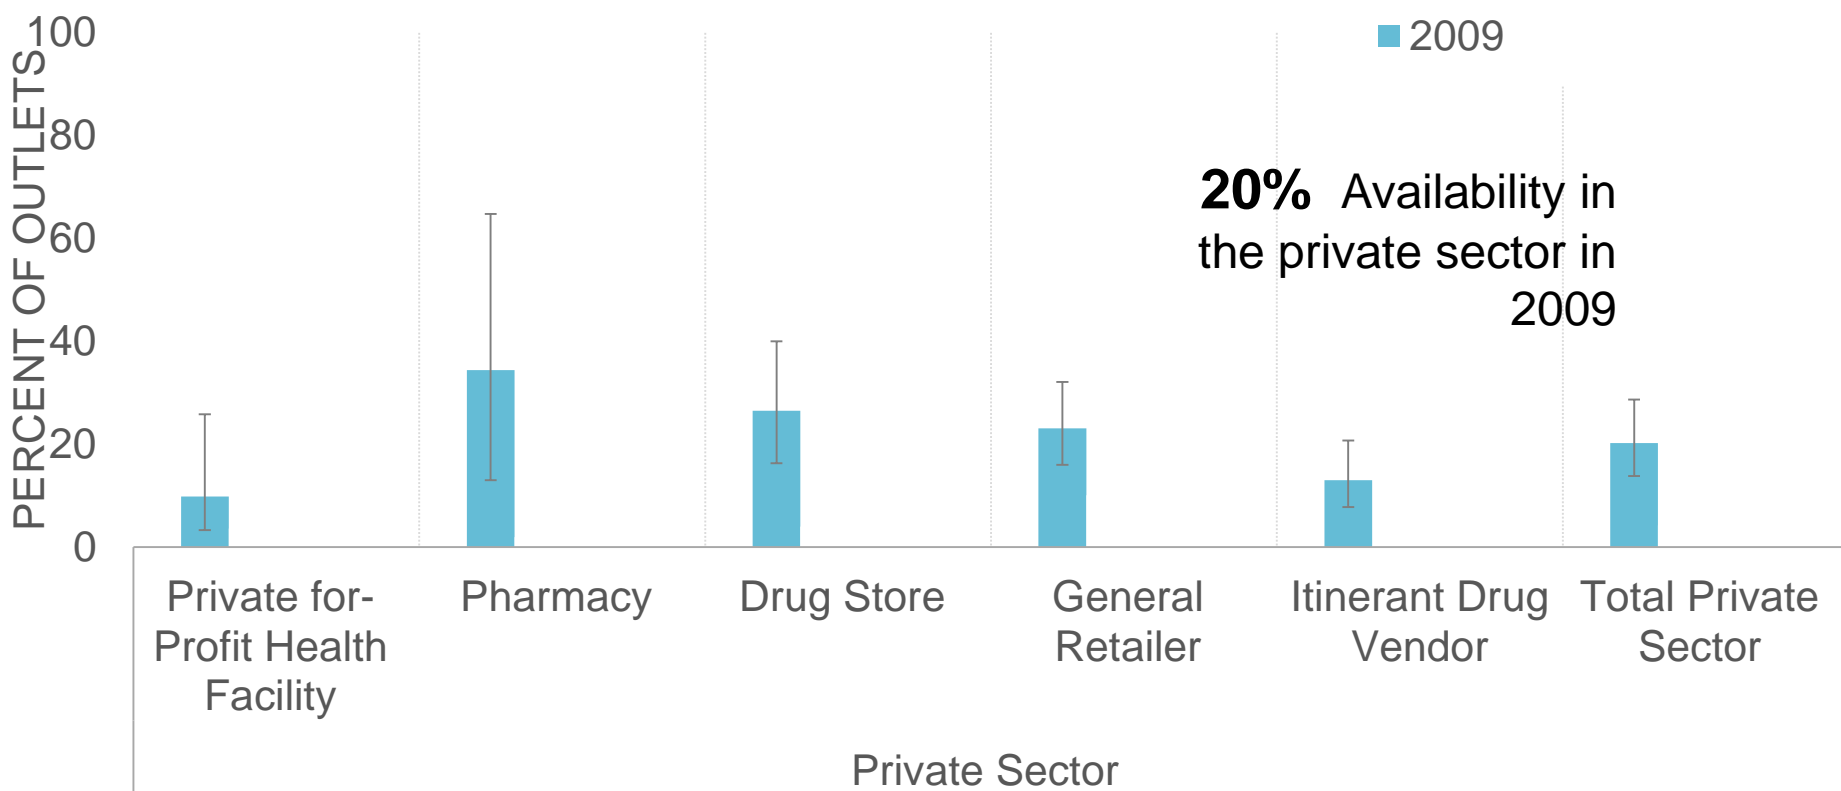

2. Availability of any antimalarial declines in the private sector

2. Availability of any antimalarial declines in the private sector

3. How available is oral artemisinin monotherapy?

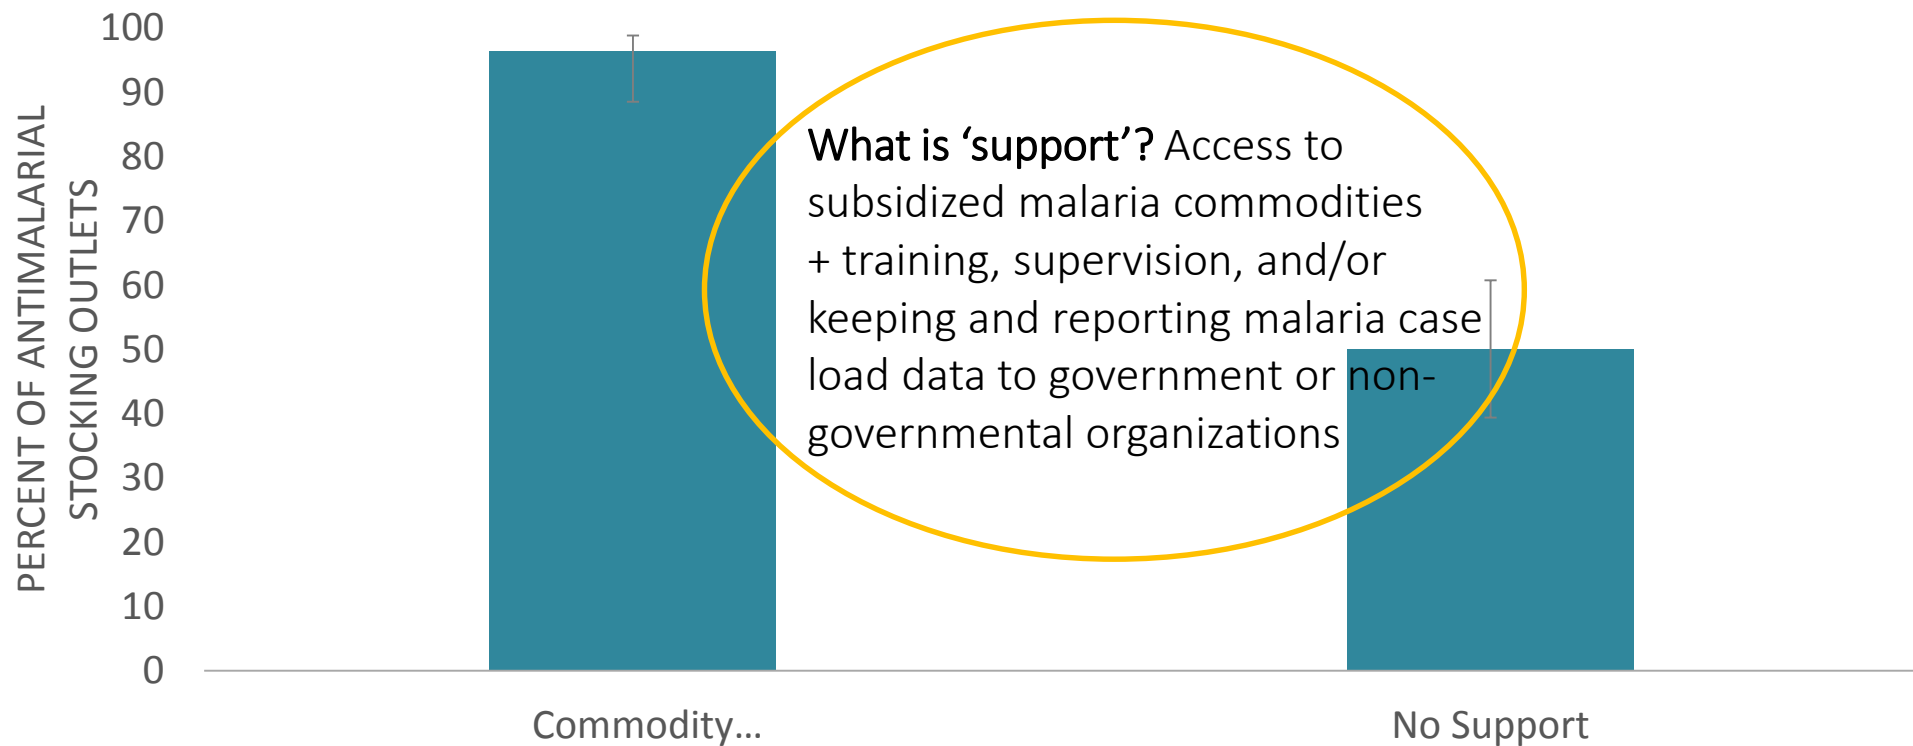

3. How available is oral artemisinin monotherapy?

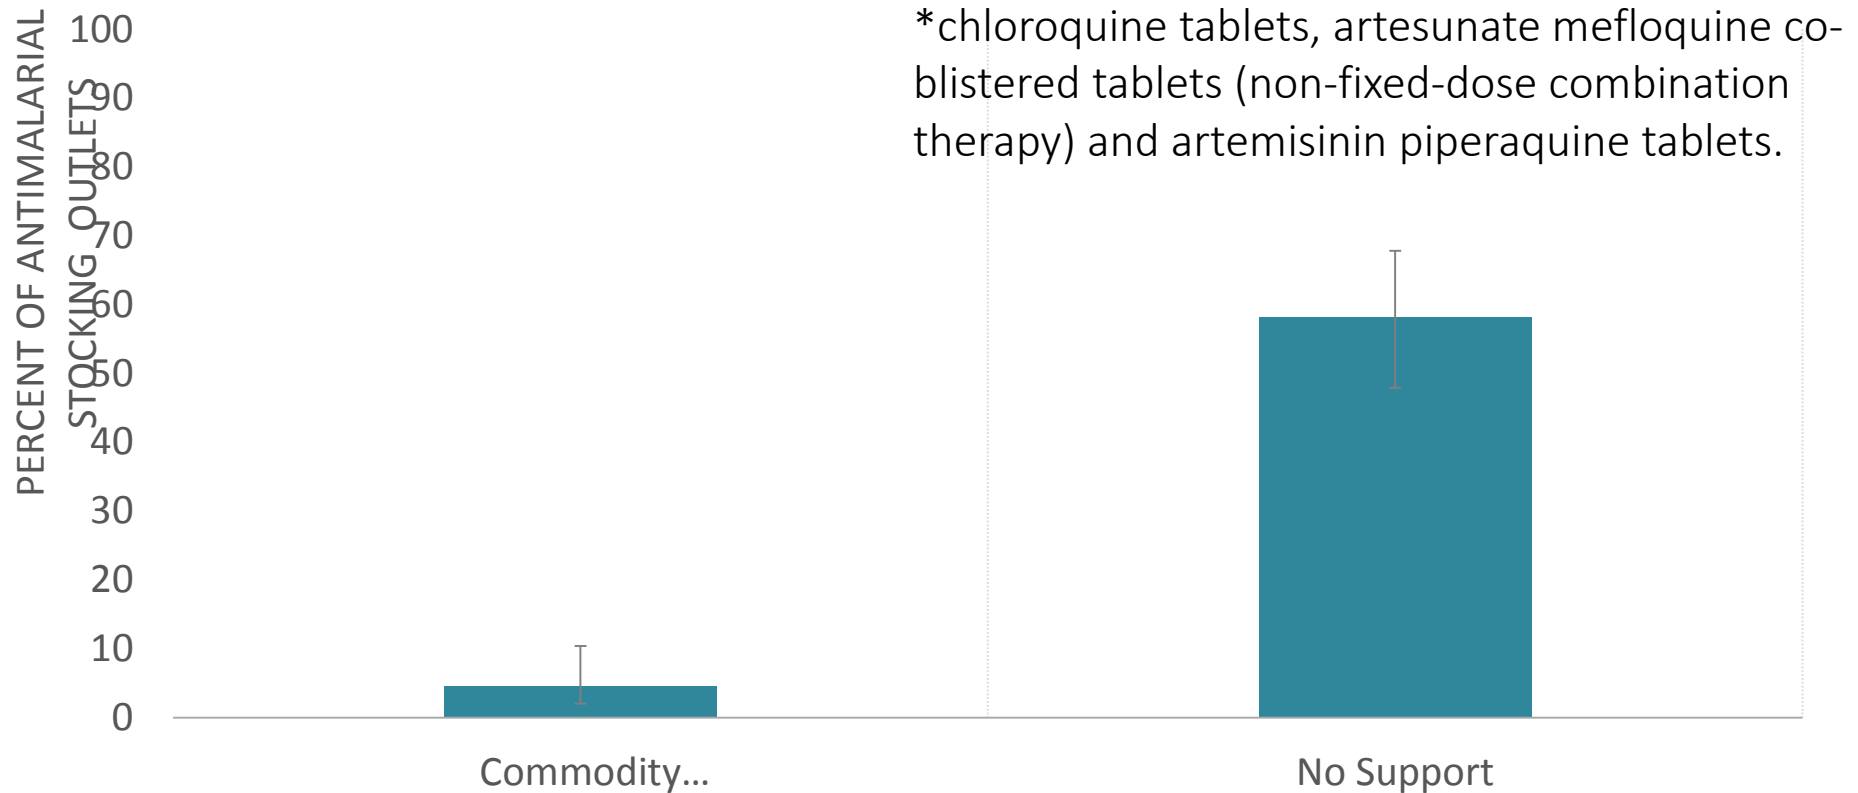

4. Are there differences in the private sector according to outlets that are receiving support?

Availability of first-line ACT in the private sector, 2015

5. Availability of treatment **not on national guidelines*** in the private sector, 2015

What Next?

- On-going analysis, particularly into PPM vs. non-PPM
- Access to ACTwatch data: www.actwatch.info
- ACTwatch 2017 study focus
 - Importance of Itinerant Drug Vendors as a source of care?
 - Coverage of DHA-pip vs ASMQ?
 - Qualitative approach to challenges with FCM?
 - PPM
 - Elimination vs. burden reduction areas
 - Lighter, more nimble survey
- Use the data!

THANK YOU
